

BLUE CANYON

ESTATE GROWN

CABERNET SAUVIGNON

THE BLUE GRAND CANYON

The Pacific Ocean profoundly impacts life in and around its waters. This is most evident with a geological marvel, the Blue Grand Canyon, that lies underneath Monterey Bay and links the sea to grape cultivation. Serving as a climatic pathway, this profound canyon connects the ocean to all four wine-growing regions that stretch southward down the Salinas Valley. With an estimated volume of 300 cubic miles of deep, cold water, the canyon exerts a vast weather influence on these regions, expressed through fog, wind and limited rainfall throughout the grape growing season.

ESTATE VINEYARDS

In our southernmost estate vineyards, the winds further affect the air temperature, causing dramatic day-to-night temperature variations. The warm days are ideal for ripening Cabernet Sauvignon grapes and other tannin-rich reds, while the cold nights ensure balanced acids and tannins. The result is complex and concentrated fruit flavors that define the essence of Blue Canyon wines.

TASTING NOTES

Concentrated and rich aromas of blackberry and plum with hints of vanilla and mocha. Ripe black fruit flavors unfold in a long and savory finish, balanced with well-integrated tannins.
